CATALOGUE AND PRICE LIST

OF

AWNINGS, TENTS, COVERS AND OTHER GOODS MANUFACTURED BY THE ANCHOR SUPPLY CO.

In this catalogue, we aim to give explicit directions for measuring any kind, style or size of awning and if there is anything that is not made clear, we ask you to write us about it. There are hardly two awnings alike and the same rules will not apply in all cases.

The cuts of tents are as near to the way they are made as it is possible to get them. We can make any size, style, shape or weight of material tent that can be made and solicit your inquiries on anything special you may need in the tent line.

In covers, we can make any style cover that can be made out of cotton duck and will be pleased to hear from you at any time for what you may need in horse, wagon, dray, stack, thrasher, binder or automobile covers made out of regular canvas, or the different styles of waterproof or solid color ducks.

The specialties listed in this catalogue, such as launch covers, burgees, initiation canvases, hammocks, etc., are manufactured by us in a large variety of sizes and different qualities of material and we will be pleased to give any desired information on these specialties.

Our facilities for turning out orders in first-class shape and promptly, can not be surpassed, as our factory is among the largest in the world and is thoroughly equipped with the most modern and up-to-date machinery used in the manufacture of the class of goods we make.

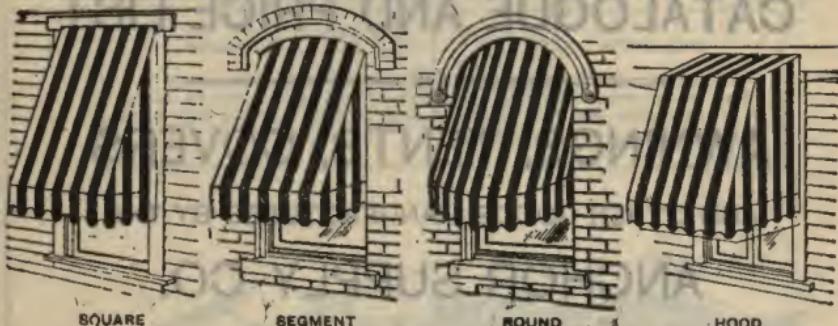

Prices are subject to a discount and we will quote net prices on application.

We offer liberal inducements to reliable business concerns, or individuals, to act as agents for the sale of awnings. There is a large demand for store, office and residence awnings and we furnish our agents, free of charge, with a complete line of samples, prices, instructions, etc. This enables them to get the awning business in their locality.

ROUND

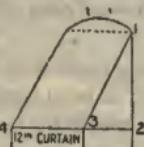

HOOD

DIRECTIONS FOR MEASURING WINDOW AND DOOR AWNINGS

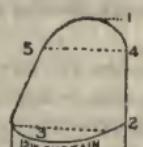

Send measurements as per diagrams below and state style of window. All window and door awnings are made with a twelve inch curtain below frame, unless otherwise specified. If fringe (which is two inches deep) is used, the curtain and fringe will be fourteen inches. If screens are used on doors or windows, see that awning is large enough to let the screen swing out. State plainly if Complete Awning or Recover only is wanted. Hood awnings require a space of eight inches or more above door or window to fasten awning properly

We solicit your inquiries for what you may need in the awning line. Our many years of successful catering to the wants of the most exacting users of awnings, enable us to furnish just what you want. Our large selection of materials gives you the variety needed for a proper selection of colors and designs. If your place of residence is not fitted with awnings, look over the directions for measuring above, send us the measurements, and we will be pleased to forward our line of samples and submit estimates on your requirements, or give name of our nearest agent.

When we give prices on window awnings, we always quote on regular style awnings which are fitted up with round grommets in the top and equipped with frames, slide rods, slides or feet, screw-eyes, ropes, glass rings or pulleys, cleats, and everything ready to erect the awning and place it in position.

We also make the following special awnings which can be furnished, if desired.

HAND DECORATED WINDOW AWNINGS, are our latest novelty and while the prices are higher than the regular window awnings, the difference is more than made up by the exclusive style and artistic appearance that they give to a building upon which they are used.

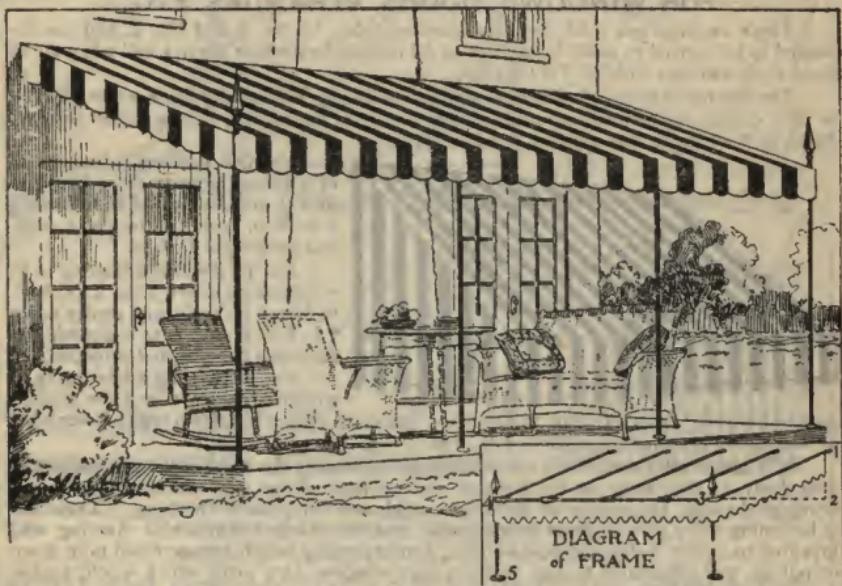

WINDOW AWNINGS FITTED WITH HEAD RODS, can be furnished, at a small additional expense. The head rod is placed in the hem at the top of awning and the fittings are permanently fastened to the window casing, thereby enabling any one to take down and put up window awnings with the least trouble and expense, as the head rod is simply placed in the fitting and a small clamp drops over the rod holding it in position. To take awning down, raise the clamp and top of awning is released.

We can also, at a small additional expense, arrange top of awning with oblong grommets, to be used with screw-eyes. When awning is to be taken down, one-quarter turn of the screw-eyes releases the top.

VENETIAN AWNING

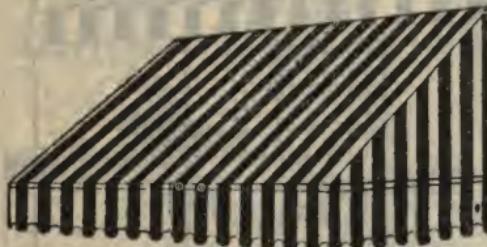

The above styles add distinction to homes, also comfort and protection from the sun.

WRITE FOR SAMPLES AND PRICES ON ABOVE AWNINGS

ANCHOR ADJUSTABLE AWNINGS FOR WINDOWS, DOORS, VERANDAS, ETC.

These awnings are made in three sizes only, No. O, No. 1 and No. 2, and are intended to be carried in stock by dealers to fill rush orders where parties will not wait to have their awnings MADE TO ORDER.

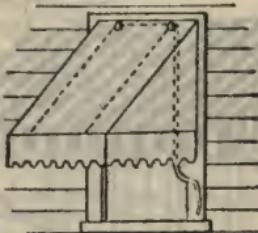

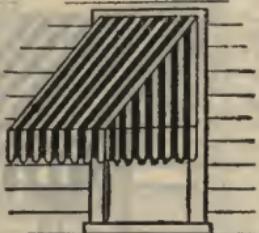

The Anchor Adjustable Window or Door Awnings are usually fastened to window or door casing, but if windows or doors are very low, the awning can be raised and fastened to wall above the door or window frame.

post on verandas from 3 ft. 9 in. to 7 ft. wide, and comes down 5 ft. from top to lower edge of scalloped curtain, and projects 3 ft. 6 in.

It is universally conceded that awnings are necessary for the health and comfort of everybody, as they keep out the hot sun, and by their shape and construction cause a draught through the rooms of buildings which are equipped with them. Their use is becoming more general from year to year, and the Anchor Adjustable Awning was invented to supply a demand now existing for an awning which anyone could take down or put up, and adjustable to any ordinary size window, at a price which would enable everybody to buy them.

The Anchor Adjustable Awnings are made out of fancy blue and white stripe, and are complete, ready to hang. No experience necessary to put them up. They will fit any ordinary window, as they are so constructed that they can be adjusted every 3 inches in width on the No. O and No. 1 size and every 6 inches in width on the No. 2 size.

Showing How it Appears on the Window. Showing Adjustment of Ropes and Fixtures.

DIRECTIONS FOR PUTTING UP

Get the width of space where awning is to go; adjust the frame to this width and fasten with the bolts which are in one part of the frame. Put up two glass rings; reeve ropes as per cut above, fasten the top of awning with screw eyes and fasten the two hinges attached to frame to window sill, also fasten cleat to building and your awning is complete, ready for use.

To take down, remove screw eyes at the top and screws in hinges where frame fastens to building. Take down glass rings and cleats and your awning is ready to use somewhere else.

Price Complete, No. O....\$6.00 each. No. 1, \$8.00 each. No. 2, \$12.00 each.

Porch Awning

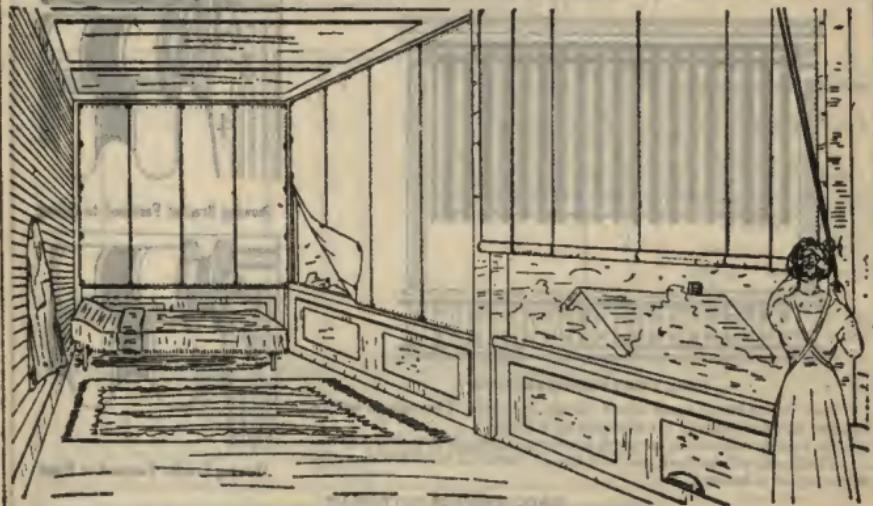

Regular Awnings
on a Modern
Residence

ANCHOR SUPPLY CO., EVANSVILLE, IND.

The above shows a sleeping porch equipped with Anchor Roller Curtains (which have the roller above) placed below the screen at end of porch, and curtain lowered below the railing. On the front it shows curtain partly lowered, and under the ceiling and under the projecting awning, it shows the curtain rolled up.

The above diagrams show some of the different methods of enclosing sleeping porches. Nearly every person has their own idea as to just what they want. We are always willing and ready to assist with our advice and experience in fitting your porch up as it should be. Send us measurements and your ideas as to enclosing it and we will be pleased to forward you samples and lowest prices.

PORCH AND VERANDA AWNINGS

DIRECTIONS FOR MEASURING

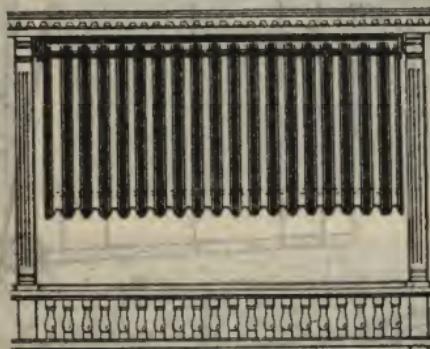

First determine the place where the joints of the frame will be fastened to the building or post, which should be from 7 to 8 ft. from the sidewalk, or ground, according to the height of the front (see figure 2 in diagram.) You will observe that the curtain—12 deep—drops below that point, for which you will have to allow in clearing people's heads. Then measure from there to where top of awning can be fastened above (see figure 1 in diagram, which will be the distance from 1 to 2, or height of awning, 2 to 3, in a high building, should be the same as 1 and 2, but in a low one a little more. Then measure the width from center of column on one side to the same on the other side, which will be the distance from 3 to 4, or width of awning. If the top where the awning is to be attached projects or is back of the level, mention how much.

DIRECTIONS FOR MEASURING RECOVERS FOR OLD FRAMES

Measure from 1 to 2, 2 to 3, 3 to 4, always stating if front rod, or from 3 to 4, is IRON, WOOD or PIPE. If wood give size of pole.

ANCHOR ROLLER CURTAIN

THIS STYLE ROLLER CURTAIN HAS THE ROLLER ABOVE

DIRECTIONS FOR MEASURING

Give full width of space where curtain is to go. The curtain will be 4 inches narrower, as the fixtures take up 4 inches.

Give distance from top to where bottom of scallop is to be when down.

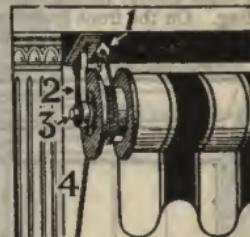

The goods will be made one foot longer, which is to be left on roller when curtain is lowered.

DIRECTIONS FOR PUTTING UP

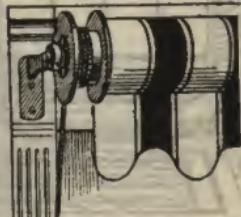

Fasten bracket as per above cuts, next wind half the rope in groove of fixture at end of roller, then run rope through screw eye which is placed at point 1, after which bring down as shown at figure 4 and fasten to cleat which should be placed within easy reach.

To raise curtain pull rope until desired height is obtained.

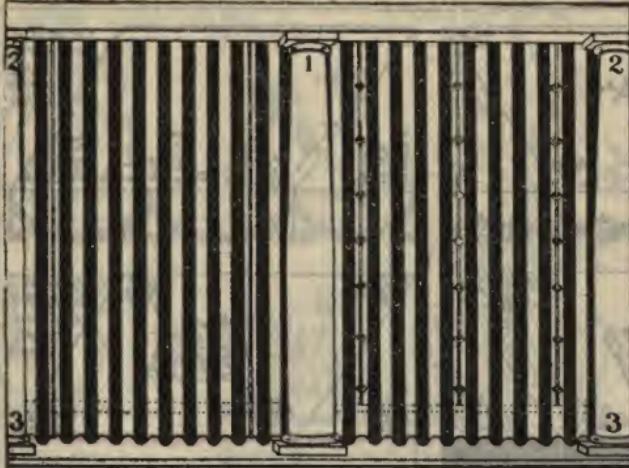

To lower curtain loosen rope and let it drop to point wanted.

ROLLER AWNINGS FOR STATIONARY FRAMES

DIRECTIONS FOR MEASURING

First state width across front of building; then total drop of canvas, measuring from point where it fastens to building to bottom of roller when awning is down. If roller is not required, state diameter, so pocket for same will be made proper size. If end pieces or wings are desired, give exact height, or from 1 to 2, projection or from 2 to 3, and length of rafter, or from 1 to 3, and make drawing describing same. Also state if scallop curtain is desired below cross bar running from 2 to 3. Roller awnings for stationary frames and Drop curtains for store sheds, porches and verandas, have no scalloped curtain below roller, unless specially ordered.

DROP CURTAINS, ROLLER AT BOTTOM

AS USED FOR STORE SHEDS, PORCHES, VERANDAS AND OUTSIDE SLEEPING ROOMS

DIRECTIONS FOR MEASURING

Measure from 1 to 2 or width. From 2 to 3 or drop. If you have roller, state diameter. Ropes, Screw Eyes and Pulleys are furnished with complete Awnings."

WRITE FOR PRICES ON ABOVE AWNINGS

STORE AWNINGS TO PULL UP WITH ROPES

DIRECTIONS FOR MEASURING

First determine the place where the joints of the frame will be fastened to the building, which should be from 7 to 8 feet from the sidewalk, according to the height of the front (see Figure 2 in diagram). You will observe that the curtain—12 inches deep—drops below that point, for which you will have to allow in clearing peoples' heads. Then measure from there to where top of awning can be fastened above the window (see Figure 1 in diagram), which will be the distance from 1 to 2, or height of awning, 2 to 3, in a high building, should be the same as 1 and 2, but in a low one a little more. If the distance from 2 to 3 is more than 10 inches longer than the distance from 1 to 2, slide rods must be used, see page 20. Then measure the width of store from center of column on one side to the same on the other side, which will be the distance from 3 to 4, or width of awning. If the top where the awning is to be attached projects beyond the face of the building or is back of the level, mention how much. When ordering a frame, state whether it is to be fixed in stone, brick, iron or wood, and whether door posts and face of building or outer columns are in line; also whether the frame requires two, three, four or more joints and arms.

DIRECTIONS FOR MEASURING COVERS FOR OLD FRAMES

Measure from 1 to 2, 2 to 3, 3 to 4, always stating if front rod, or from 3 to 4, is IRON, WOOD or PIPE. If wood, give size of pole and state if pocket is wanted, or if awning is to fasten to the wood front bar with screw eyes. If iron or pipe, state if you want pocket for frame, or if it is to tie to frame through eyelets placed in awnings for that purpose.

WRITE FOR PRICES AND SAMPLES OF MATERIAL.

ANCHOR SUPPLY CO., EVANSVILLE, IND.

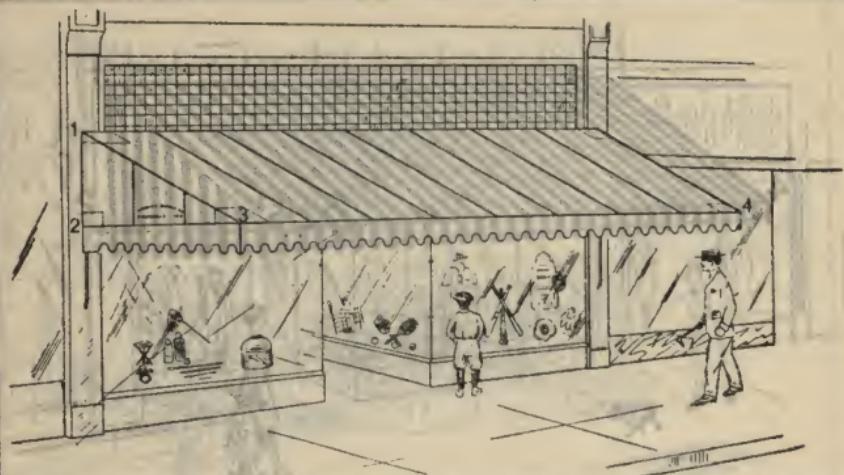

STORE AWNINGS TO PULL UP WITH ROPES

DIRECTIONS FOR PUTTING UP

First ascertain the height of the Awning, that is from 1 to 2; measure that distance down from Fig. 1 in diagram, which is the place for the joints (See Fig. 2). If the columns are iron, they will have to be bored and tapped and the ends of the joints threaded to screw in; if stone or brick make holes 3 in. deep and use expansion stubs; if wood, fasten on with screws. Be careful to have the joints in line, and if any of the columns stand back, put the long joints on them; now fasten the bars to the joints with the joint screws and pass the front rod through the middle ones, and put on both end bars and screw on the nuts. Put up the pulleys, pass the ropes through the pulleys, one through each center pulley, and attach to front rod, the outside ropes first through the center, then through the outside pulley, and fasten to the front rod, 12 in. from the end. Now take the Awning, and while the frame is in the same position as shown in the diagram, take off the outside nuts, put the ends of the front rod through the large holes in the corners of the Awning and replace the nuts outside the Awning; tie to front rod with a tarred string, then raise it up and fix the top to the front at the proper height from the joints; let it down and tie the sides to the arms with the tarred string by passing them through the eyelet in the Awning at the side, just above the scallop, and it is finished.

If the Awning frame has a wood front bar, we either make a pocket for the wood front bar or fasten the awning to the wood front bar with screw eyes placed through eyelets, which are put in the awning for that purpose.

ANCHOR SUPPLY CO., EVANSVILLE, IND.

REGULAR STORE AWNING TO PULL UP WITH ROPES

SHOWING FRAME WITHOUT CENTER ARMS AND SLIDE RODS ON END COLUMNS

The frame for this style awning can be made with round or square corner braces or a trussed front bar. As the awning is placed below the prisms, slide rods must be used to allow the frame to drop into position when awning is pulled up

REGULAR STORE AWNING TO PULL UP WITH ROPES

SHOWING FRAME WITH TWO CENTER COLUMNS AND SLIDE RODS ON FOUR COLUMNS

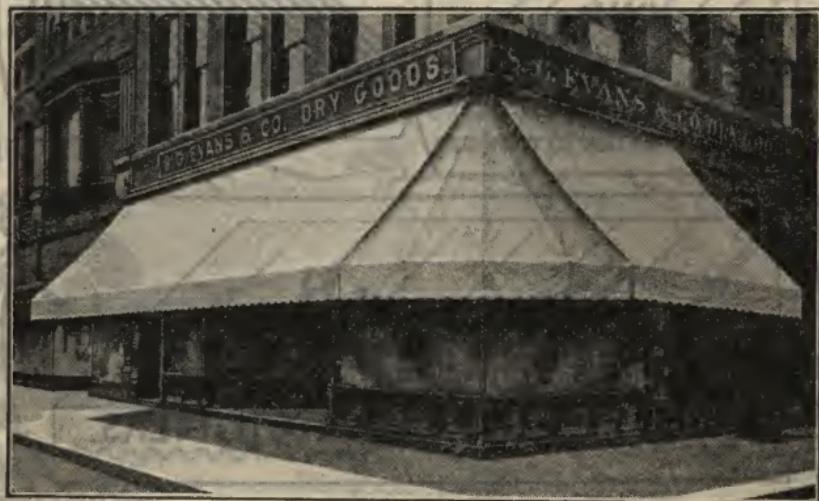

This style frame can be used where there are 3, 4, 5 or more columns and up to thirty feet wide. For fronts wider than from 24 to 30 feet, we always recommend the Anchor Cog Gear Roller Awnings, which can be made up to 100 feet wide, if necessary. See page 25.

ANCHOR SUPPLY CO., EVANSVILLE, IND.

FOLDING AWNING WITH PULL UP ROPES RUNNING THROUGH RINGS ON TOP OF AWNING

This throws the wear on the rings, not on the cloth, as is the case where ropes are used underneath the cloth. Awning cannot blow out over front rod, nor up in the air and when pulled up wet, the air can circulate through the folds. The cloth cannot be drawn into the pulleys, which insures the awning lasting much longer.

"ANCHOR" COG GEAR ROLLER AWNING

40 FEET LONG, SIDE AWNING 14 FEET LONG

Connected with circular corner. Khaki goods and scallops trimmed with fringe. The fringe on curtains put on only when made a special order at a cost of 8 cents per foot extra. This style of Awning can also be made to pull up with ropes. Either ropes running underneath or ropes on top. The pull up with rope Awning would not be practical on a front more than 24 feet wide.

PATENT COG GEAR ROLLER AWNING

WORM TOP GEAR WITH HOOK AND
REMOVABLE WINDING BRACE
LONG HANDLE AND EYE TO HOOK IN
TOP GEAR

This is used when no proper fastening for gear box is available or holes can not be drilled for gear box fastening. On large awnings a more powerful worm top gear and hook is used

WORM TOP GEAR

All ordinary size gear roller awnings are equipped with our celebrated Worm Top Gear. It is simple in construction, speedy in operation.

COG TOP GEAR

On large heavy awnings we supply Cog Top Gears.

"ANCHOR" PATENT COG GEAR ROLLER AWNING

DIRECTIONS FOR MEASURING

First determine the place where joints of frame will fasten to the building, which should be from 7 to 8 feet from sidewalk, according to height of front. The curtain, 12 inches deep, drops below that point, for which you will have to allow, for the bottom of curtain should be at least 6 feet 3 inches from sidewalk. Then measure from where frame fastens (2) to the point where awning will fasten above (1). This gives the distance from 1 to 2. If the distance from 2 to 3 is more than 6 inches longer than from 1 to 2, slide rods must be used. Then give extreme width that awning is to cover. This will be the length of the top roller. But the awning and front rod is always 6 inches shorter, on account of end journals and working gear of awning, which take up six inches.

State how many joints and projecting bars or arms frame requires; also if in line and whether they fasten into iron, stone, brick or wood.

State if top fastens to brick, iron, stone or wood, also if in line with upright columns. If back, how much. If projects, how much.

We always furnish End Curtains with awnings and make them separate as per page 25. If they are to be made attached to awning, or if you do not want any end curtains, please state this when ordering.

SLIDE RODS

If the distance from 2 to 3 is more than double the distance from 1 to 2 the slide rods cannot be made to work automatically. They must be pushed into position by hand every time the awning is lowered. (See page 31.) This can be overcome by using Lateral Arms.

LATERAL ARMS

If there is no place to fasten the arms of the awning, or if a longer projection is wanted over sidewalk than the height of the front will allow, Lateral Arms must be used. These project 5, 6, 7, 8 or 9 feet and can be used where the distance from 1 to 2 is 30 inches or more. They fasten on the transom bar, or to the building above the windows, directly under the top roller. (See page 30). The actual projection of the awning or from 2 to 3 will be less according to the length of the Arms used and the distance from 1 to 2.

SEND US MEASUREMENTS AS PER ABOVE, TELL US WHAT YOU WANT, AND WE WILL PROMPTLY FORWARD SAMPLES AND LOWEST PRICES.

"ANCHOR" PATENT COG GEAR ROLLER AWNING

DIRECTIONS FOR PUTTING UP

The best and easiest way to put up Cog Gear Roller Awnings is to have the top roller fixtures fasten to a plank $1\frac{1}{2} \times 8$, and then bolt the plank to the building. This method gives a good fastening for a roof board or galvanized roof, for the top of plank can be beveled to give the roof the proper pitch. This way of fastening places all the bearings in perfect line. We can fit the fixtures to a plank at the factory and furnish the galvanized roof at a reasonable price or parties can make their own arrangements about plank and roof. If plank is not used, determine the place where awning fastens to building at the extreme right and left ends at the top. On the end at which operating box is to be placed, fasten the cog gear for top. On opposite end, place the end bracket. The bearings of these two parts should be in perfect line. After these parts are securely fastened, draw line from center to center of journal boxes across building; ascertain how many center supports are needed, divide the extreme width into as many equal parts as there are center supports. Place the center supports in position, allowing space for the roller between them. After center supports are fastened, place the long roller in position and fasten securely at each end. If the long roller is a wood roller, tack awning to it. If it is a tubing roller, fasten the awning to it by tying through the eyelets in the awning and through the holes drilled in the tubing roller for that purpose. Fasten each end first, and divide slack canvas equally across front. The lower fastenings for frame are the same as in an ordinary awning. The operating box is generally fastened about three feet from the ground in a line with the top gear. We send with each awning universal couplings, which are attached to the end of the operating rod, so it makes no material difference if the box and top gear are a little out of line. Do not place operating box in position until you have fitted the operating rod in place, when you can put the box exactly where it belongs. After frame is in position, fasten the awning to the wood front bar with screw eyes through the eyelets, which are placed in the awning for that purpose, or if it is a pipe frame, tie the awning to it. To fasten the separate ends, the upper part of end is securely fastened directly under the roller or at point No. 1. The lower end is fastened to front bar at point No. 3, and the other fastening is at point No. 2. If there are no slide rods used with frame, the end can also be tied to the projecting arm of frame or from 2 to 3. If slide rods are used, fasten at point 1, 2 and 3. We place rings on the inside edge of the end curtain and by placing a pulley at the upper inside corner and running a cord through the rings and attaching to front rod, the ends can be folded up by simply pulling the rope tight when awning is raised. (See diagram, page 25.) We always furnish steel tubing rollers with our awnings.

MODERN UP-TO-THE-MINUTE STORE FRONT

WITH "ANCHOR PATENT COG GEAR ROLLER AWNING" BELOW PRISM
Equipped with Steel Tubular Roller and Slide Rods and Chains.

THE LATERAL FOLDING AWNING ARM

AS USED WITH ANCHOR COG GEAR ROLLER AWNINGS FOR PRISM GLASS FRONTS
WHERE AWNING IS TO BE PLACED BELOW THE PRISM GLASS

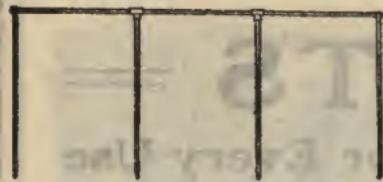

THE ONLY AWNING ARM THAT CAN BE
USED ON ALL GLASS FRONTS
WHERE THERE IS NO PLACE TO FASTEN
THE USUAL STYLE OF AWNING ARM

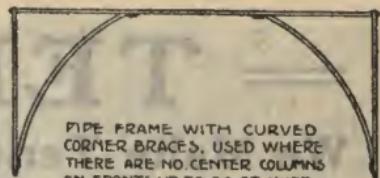

This arm was invented to fill an existing want. The average modern store front as constructed at present, leaves no room for slide rods or fastenings for awning arms. There is usually nothing but glass for eight or ten feet from the sidewalk up, then a transom bar and the upper part of the front prism glass. This arm fastens to the transom bar if it is wide enough, or it can be used above the prism glass if desired. If the transom bar is to be used for fastening, and is not wide enough, a fastening must be provided if an awning is to be used on the front. For this purpose a plank, size $1\frac{1}{2} \times 6$ inches can be used. The arm is adjustable to any slant and the adjustment cannot slip. On fronts up to 22 feet wide, we think two arms are all that are necessary. They should be placed about 4 feet from each end of the awning and the folding part or hinge arranged to fold out to the edge of the awning. By setting them this distance in it lessens the distance from pivot to pivot on the front rod. We find that two arms will readily carry an awning 22 feet wide, but three arms can be used if desired. Where fronts are wider than 22 feet, the arms should be placed about eight or ten feet apart to obtain the best results. These arms are made to extend 5, 6, 7, 8 or 9 feet.

ANCHOR UMBRELLA ONE POLE TOURING TENT

SIZE: 9 ft. x 11 ft. Height Center, 8ft. Height Wall, 6 ft. 6 inches. 5 ft. square at top.

WEIGHT: 45 lbs. complete.

PRICE: \$56.00 for complete tent, center pole, frame, steel stakes and sack. F. O. B. Evansville, Ind.

Floor sewed in tent made of 8 oz. Paraffine Duck, \$13.00 extra.

Bobbinet door sewed in tent, \$3.00 extra.

SIZE: 7 x 7. Height Center, 7 ft. 6 inches. Height Wall, 6 ft.—4 ft. 6 inches square at top.

WEIGHT: 32 lbs.

PRICE: \$35.00 for complete tent, center pole, frame, hardwood stakes and sack. F. O. B. Evansville, Ind.

Floor made out of 8 oz. Paraffine Duck, \$7.00 extra. Bobbinet door sewed in tent, \$2.50 extra.

These tents are practical for camping and touring, because of the large amount of head room. They are quickly and easily erected and their style of construction hold these tents securely in place in windy weather. Tents roll into compact bundle 10 inches in diameter, 4 feet long and jointed pole is tied to it. The door can be stretched in front of tent as an awning.

MATERIAL: Above tents made of Forest Green Shelter Tent Duck, closely woven.

EQUIPMENT: Tents have spliced center pole, collapsible frame arms and stakes. Heavy canvas sack for tent, frame arms and stakes.

CONSTRUCTION: Roll up door at front with double snaps and rings for closing. Screened window at back with roll up flap. Sod cloth all around bottom of tent. Reinforcing webbing sewed on all four corners and around upper part of tent.

Dark Room size, 6 x 6, \$41.40. Dark Rooms are made of 8 oz. blue or black duck, and lined with red or yellow drill. Dark Room size 4½ x 4½, \$32.60. For side skylight, add \$4.00 extra.

Special sizes quoted on application. Add 5% for each additional six (6) inches in height of wall.

Prices do not include flies. If flies are wanted, prices will be quoted according to style and size of fly required.

Khaki, Brown and other solid colors can be used in the construction of these tents. Prices on request.

Our Photographers' Khaki or Brown Duck Tents are the height of perfection. Doors and skylights are put wherever wanted.

PHOTOGRAPHERS' TENTS have been manufactured by us a great many years and special attention has been paid to the requirements of the profession in the manufacture of these tents. The suggestions for improvements from parties using our tents have been noted and put into execution wherever practicable, and your tent is made right when made by us.

Fliers will be furnished without poles at two-thirds the price of tent.

If 9-inch sod cloth is wanted around bottom of tent, there will be an additional charge of 4¢ per linear foot net.

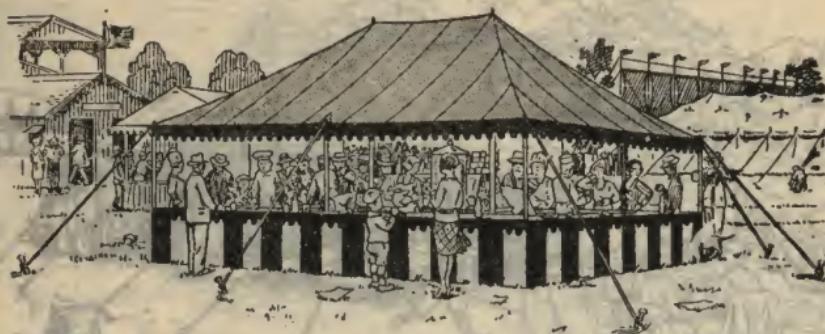

If walls are wanted of one grade lighter duck than top, deduct 3%.

Partitions are made of 8 oz. duck, 12¢ per square foot.

Special sizes quoted on application. Add 5% for each additional six (6) inches in height of wall.

Khaki, Brown and other solid colors and a large variety of fancy stripes are used in the construction of these tents where parties desire something exclusive. Samples and prices of which will be furnished.

IDEAL CAMPING TENTS are all that the name implies when used for camping. By raising the end walls, awnings can be formed which make a very desirable place to cook. Side walls are detachable at corners so they can be tied up during the day.

Special sizes quoted on application.

Prices do not include flies. If flies are wanted, prices will be quoted according to style and size of fly required. Counter Curtains furnished at reasonable rates.

Tents are hand roped on eaves, and strengthening bands and stay pieces are placed where necessary.

Khaki and other solid colors and a large variety of fancy stripes, and wide bar red and white or red and blue goods are used in the construction of these tents where parties desire something exclusive. Samples and prices of which will be furnished.

REFRESHMENT TENTS (TOP ONLY) are used as stands for the sale of eatables and refreshments, and also as dining rooms at fairs, circuses, shows, chautauquas, camp meetings, etc., and are especially adapted for this purpose.

Special sizes quoted on application. Add or deduct 5% for each six (6) inches added to or deducted from height of wall. Prices do not include flies. If flies are wanted price will be quoted according to style and size of fly required.

Walls are attached to tent, but can be made detachable if desired.

Partitions can be used to regulate size of rooms. They are not included in above prices, but can be furnished at a reasonable cost. The middle section of wall on either side can be extended as an awning as shown in cut.

Tents are hand roped on eaves, and strengthening bands and stay pieces placed where necessary.

Khaki or other solid colors and a large variety of fancy stripes are used in the construction of these tents where parties desire something exclusive, samples and prices of which will be furnished.

FAMILY COMPARTMENT TENTS are, as the name implies, very suitable for family camping. The size of tent and size of rooms can be regulated according to the number of persons in the camping party.

WALLS FOR ABOVE TENTS 7 FT. HIGH

8 OZ. S. F. WHITE, 80 CTS. PER FOOT
8 OZ. D. F. WHITE, 86 CTS. PER FOOT
10 OZ. S. F. WHITE, 90 CTS. PER FOOT
10 OZ. D. F. WHITE, 98 CTS. PER FOOT

8 OZ. S. F. KHAKI, 92 CTS. PER FOOT
8 OZ. D. F. KHAKI, 98 CTS. PER FOOT
10 OZ. S. F. KHAKI, 1.02 CTS. PER FOOT
10 OZ. D. F. KHAKI, 1.18 CTS. PER FOOT

Special sizes quoted on application. Walls are made detachable. Tents are hand roped on eaves on smaller sizes and on ridge, eaves and hips and at each side pole where sizes are large enough to require this extra roping. Strengthening bands and stay pieces placed where necessary.

GRAVE OR CEMETERY TENTS are used as the name implies, for the purpose of protecting the grave, and the people attending the last sad rites, from the elements. In the summer, from the hot sun. In the spring and fall, from the rain, and in the winter from the cold, snow and sleet. With walls all around tent, it can be enclosed like a room. No undertaker or Cemetery Association can afford to do without the protection which a tent of this kind offers.

MOUND COVERS

MADE OF GREEN, KHAKI OR BLACK DUCK

These covers are used to cover the dirt which has been thrown beside the newly dug grave. The flowers can be placed on this cover and this effectively hides from view the new dirt until the services are completed. Size 6x10 Light weight material each \$ 8.00. Size 6x10 Heavy weight material each \$10.00. Larger or Smaller Sizes in Proportion.

ROUND TENTS are used for Merry-Go-Rounds, Riding Galleries, Side Shows, Circuses, Dressing Rooms, Gospel Meetings, Stock Sales and for the display of Merchandise and Machinery, etc., at State and County Fairs, and a variety of other places where a circular tent is best adapted for the purpose.

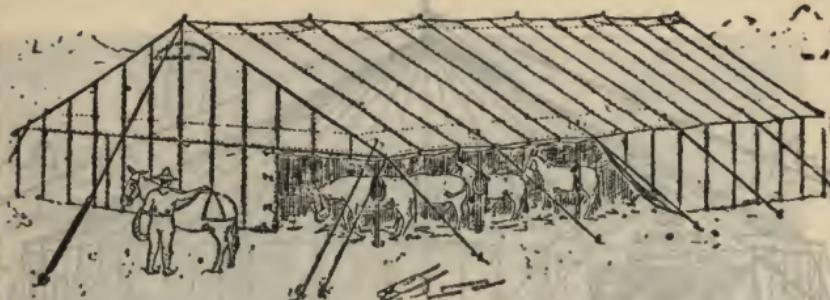

OBLONG TENTS ROUND ENDS

Prices for all sizes and colors quoted on application.

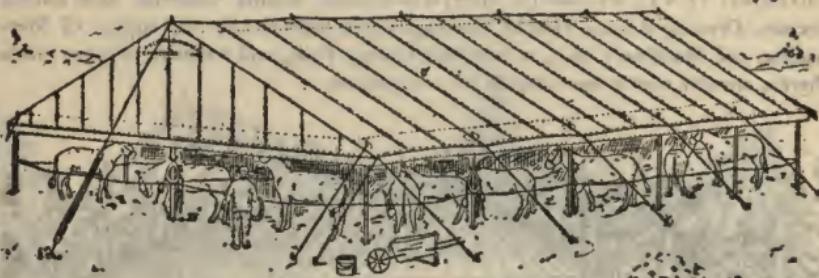

Oblong Round End Tents are used for Gospel Meetings, Side Shows, Dressing Rooms, Stock Sales and for the display of exhibits and merchandise.

WRITE FOR PRICES ON YOUR REQUIREMENTS

STABLE TENTS WITH WALLS

STABLE TENTS are made in best manner and properly reinforced where strength is required. They are roped on ridge, gables, eaves and one foot in from eaves, or where side poles are placed, also every seven feet or every third width across the top. Walls 6 feet high are usually made detachable unless otherwise ordered.

STABLE TENTS. TOP ONLY.

STABLE TENT TOPS WITHOUT WALLS are made in best manner and properly reinforced where strength is required. They are roped on ridge, gables, eaves and one foot in from eaves, or where side poles are placed, also every seven feet or every third width across the top. Walls can be used at any time if desired.

Prices on all sizes and different grades of material will be quoted on application.

Our Stable Tents are noted for strength and durability. Nothing is left undone which will make them withstand rough usage and they often weather storms which destroy other makes of tents. They are favorably known in all parts of the United States by contractors, road builders, and others who know what is required in this style of tent.

SEND US SPECIFICATIONS OF YOUR REQUIREMENTS

TENT RENTING DEPARTMENT

We have for rent large oblong and round tents, capable of seating from 100 to 3,000 persons, for Meetings, Conventions, Political Gatherings, Skating Rinks, Chautauquas, etc., or for use as Show Rooms at Expositions, Fairs, etc.

We have also large and small Chautauqua Tents and Wall Tents, Cots, Chairs, Camp Stools, etc., to rent for Military Encampments, Conclaves, Camp Meetings, Sunday School Assemblies, etc., or for small Camping or Sporting Outfits. Candy, Refreshment or Sleeping Tents for special occasions to rent either by day or week.

Parties requiring medium or large outfits will find it advisable to make arrangements early. Send for estimates giving quantity and kind of tents desired, and stating at what date and for what length of time required.

The tents we rent are always in first-class condition, as we sell our rented tents before they get old.

The following sizes are always carried in stock for renting purposes.

WALL TENTS

SEE PAGE 40

Our Wall Tents are made new every season and are therefore always in first-class condition. We do not rent Rags. They are made out of 10 oz. Duck and are well made and cut full size in Height, Width and Length.

PADDLE WHEEL TENTS

SHOWING AWNING EXTENDED IN USE
EQUIPPED WITH STORM GUYS BUT NO FRAMES OR POLES

This Style Tent is used where a big display of goods is desired as the entire front of tent is open. For the sale and display of Cushions, Pennants, Poodle Dogs, Dolls, Box Candy, etc., they are unequalled. They are usually made with high walls and Bally Hoo or Counter curtain is also high and the awning is made just large enough to cover the space between top of tent and Counter curtain, and used as a wall to close front of tent.

PADDLE WHEEL TENTS

SHOWING AWNING DOWN, USED AS A WALL AND FRONT CLOSED
EQUIPPED WITH STORM GUYS BUT NO FRAMES OR POLES

This Style Tent can be made of white duck or awning stripes or of Solid Color Khaki, Red, Blue, Brown, Green, Yellow or any of the different combinations of colors in one-half or full widths of material in all the different weights of goods from Drill to Army Duck. We usually trim them with a different color than the top is made in order to make a striking contrast, and we use every endeavor to make our tents as distinctive as possible by combining colors that match.

When you buy an "Anchor" top, you get the best there is.

CONCESSION FRAME TENTS WITH GABLE ENDS

EQUIPPED WITH STORM GUYS, BUT NO FRAMES OR POLES FURNISHED

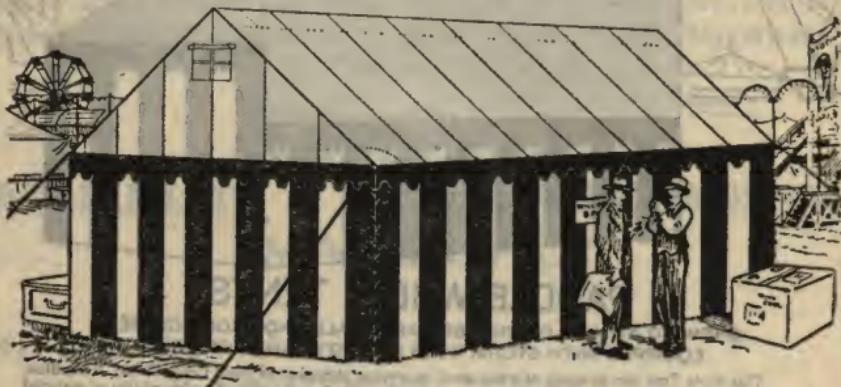

ANY SIZE MADE TO ORDER. As there is such a variety of sizes required for the different purposes for which these tents are used, we prefer to quote prices and send samples on application.

Bally Hoo or Counter Curtains furnished at lowest rates. Ventilators placed in gables of all Concession tents unless otherwise ordered.

Khaki, Red, Yellow and other solid colors and a large variety of fancy stripes and combinations of colors are used in the construction of these tents where parties desire something different. Fringe on curtain instead of binding can be furnished.

CONCESSION FRAME TENTS WITH GABLE ENDS are made of best materials and have band or strengthening pieces at all corners, at eaves and ridge, and 12 inch scalloped curtain all around at eave.

We finish the edge of eave and gables with a heavy roll, which does not draw up when tent is wet. Tops have eyelets at eave to tie to frame and large rings roped on at corners for storm guys. Walls are made to snap to the top of tent and are in two pieces, back and two sides in one piece, and front in one piece, and lap one foot at corners and snap together, or can be made to lace at corner if so ordered. Tents are made with sufficient pitch to throw off the water.

CONCESSION FRAME TENTS WITH GABLE ENDS

EQUIPPED WITH STORM GUYS, BUT NO FRAMES OR POLES FURNISHED

CONCESSION FRAME TENT

GABLE ENDS

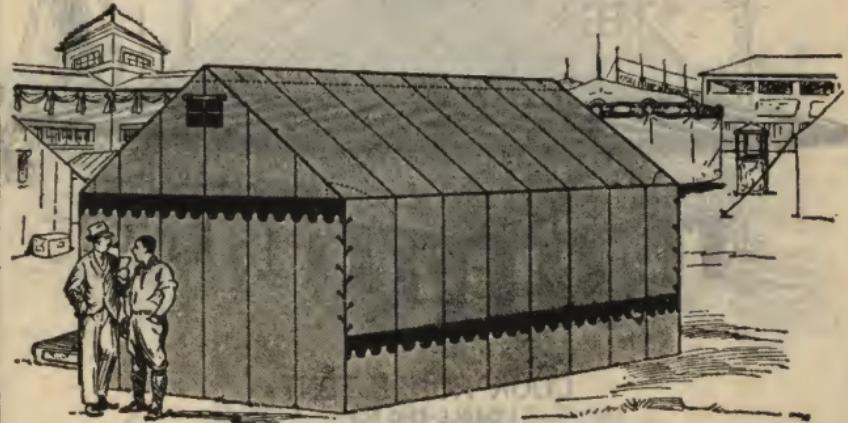

WITH FRONT WALL USED AS AWNING AND COUNTER CURTAIN.

The awning has a pocket for frame, and can be arranged to use at gable end, if preferred, and may be made attached or detached. ANY SIZE OR COLOR MADE TO ORDER.

Walls are detachable and made to lace at front corners.

Ventilators placed in gables of tent, unless otherwise ordered. Fringe on curtain instead of binding, if desired.

Tops have a tuck with eyelets on inside of tent at eave to tie or nail to frame, and large rings at corners for storm guy ropes. See below for tent closed.

TRAVELERS' TENT No. 3
WITHOUT AWNING

High Wall With Wall Poles Inside.
Made With or Without Scalloped Curtain.

TRAVELERS' TENT NO. 4

Same as No. 1 but with Ridge Pole awning. Separate walls for awning can be furnished. Scalloped curtain can be put under eaves and gable if wanted

TRAVELERS' TENT NO. 5

Latest and most complete tent ever designed. Top and awning combined. Side tents if wanted to snap on one or both sides. Roll up or double lap doors front and back. Walls to enclose awning can be furnished. This is the best travelers' tent on the market.

These tents are made with six inch eaves and have nine inch sod cloth all around. When walls are furnished for the awning we put double scalloped curtain on awning and the walls snap between the two curtains.

Strong reinforcing patches are sewed in the corners of the tent. These tents are well sewed and reinforced throughout to stand hard wear. The material is usually 12 oz. D. F. Khaki mildew repellent Duck which withstands hard wear.

Trimming inside and awning scallops can be furnished in red, blue, green, orange or striped materials.

SKATING RINK TENT

OBLONG SQUARE END HIP ROOF

ANY SIZE OR COLOR MADE TO ORDER

Roller Skating Rink Tents can be made with top in 2, 3, or 4 pieces and laced together if desired

The Roller Skating craze sometimes subsides but never dies out. An outfit like pictured above will get the same results as a \$10,000.00 building or expensive portable rink. The tent can be set up anywhere and oftentimes can be placed where other outfits could not find room

MOTOR DROME TENT TOP

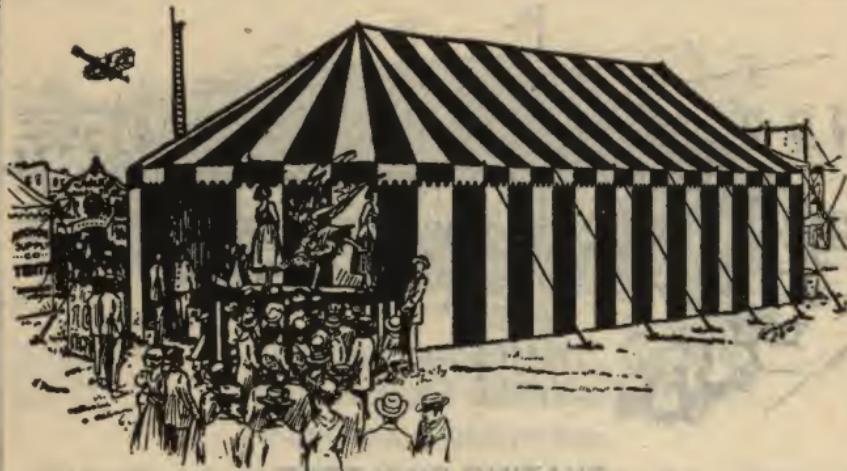

The hard usage to which this style of top is put, being up in air where every gust of wind hits it, requires that it be made as strong as possible.

We make any style of tent required for work of this character. Forty years of knowing how, and when you see "Anchor" Tops they tell the tale.

ANCHOR SUPPLY CO., EVANSVILLE, IND.

CANVAS DOORS FOR DRY KILNS

WHITE, KHAKI OR BROWN DUCK, ALL WEIGHTS

Made to order in sizes to fit openings, of best quality of Cotton Duck, sewed with heavy twine, double seams.

Pockets extend across face of door about three feet apart, sufficiently large to take wooden battens $3\frac{1}{2}$ in. x $\frac{1}{8}$ in. Pocket at bottom to take 3 inch diameter wood roller.

In ordering Canvas Curtains, measure full width of space that curtain is to occupy.

For height, measure from point where curtain fastens at top down to where it rests at bottom—we add sufficient to go around roller.

We furnish ropes and pulleys if desired.

Prices quoted and sample of Duck sent on request.

INITIATION CLOTH OR
BLANKET

Made of heavy duck, roped all around the edges, rope handles fitted in eyelets and re-inforced wherever necessary.

Made in any size or shape.

Price per square foot, complete... 25 cts.

TAKES UP NO SURPLUS ROOM. YOUR BED IS ALWAYS MADE UP.

ALL MODERN JAILS, INFIRMARIES, PRISONS, ASYLUMS are, or should be, equipped with the "Anchor Canvas Hammock." They are made out of 20 ounce, heavy white cotton duck, well made, and staved in center and on ends where strength is necessary, with rope sewed all around the edge. The ends are doubled over six (6) inches, with extra heavy piece of goods underneath, making three (3) parts of canvas at each end where straps are attached to hammock, and through the center of the hammock lengthways there is an extra strip of heavy canvas four (4) inches wide, sewed on with double row of stitching, so that hammock CAN NOT give in the middle. The eyelets, through which bolts pass in attaching straps to hammock, are iron rings, sewed in by hand with heavy twine, and then a brass center inserted, so there is absolutely no chance for wear nor danger of eyelets tearing out. Straps are out of best selected leather fifteen (15) inches long, and fastened to hammock with nut and bolt attachment, so that they can be taken off very quickly by anyone when hammock is to be washed, thereby saving the expense of having them sewed on after washing, or if left on hammock, be ruined by boiling in hot water. Any person with a small wrench can take the straps off and put them on again in a few minutes.

- WHEN THE HAMMOCK IS ROLLED UP

during the day the entire cell is at the disposal of the occupant. The old style bedstead is always in position, or folded against the wall in an unsightly and unhealthy manner, and taking up room which can otherwise be utilized during the day. This hammock has nothing about it that can be used as a weapon by refractory prisoners in case of an outbreak or insurrection, and as to cleanliness, their is no place for insects to harbor.

NO BUGS, NO LICE, NO DIRT

will trouble you while you use our hammock, for they can be kept clean. There are thousands now in use in different institutions all over the country, as by their simplicity and lack of trouble to keep clean, they recommend themselves to everyone connected with places which have use for this style of bed.

PRICE OF ANCHOR CANVAS HAMMOCKS

We furnish the Hammocks at \$74.00 per dozen, complete with straps, buckles and bolts. Without straps, buckles and bolts, but complete in every other way, \$10.00 per dozen. If parties prefer to have straps riveted to hammock, we will furnish them at \$67.00 per dozen, but of course straps are not detachable. Prices F.O.B. Evansville, Ind.

TERMS: Cash with order, or payment allowed at first board meeting following purchase and we can ship by freight or express as desired.

WHEN ORDERING PLEASE MENTION LENGTH YOU WISH HAMMOCK, as we make them from 5 ft. 6 in. to 6 ft. 6 in. long, but all are 2 ft. 4 in. wide. All hammocks over 7 ft. long at a small advance in price.

Sample corner sent on application
